

# Do's

## Where Air conditioning system is installed

1. After parking in the sun, drive with windows rolled down for a few minutes to blow off hot air before switching on A/C.
2. Keep all windows rolled-up **when AC system is working.**
3. If you feel irritation in the eyes due to smoke or during long drive, stop A/C and ventilate for half a minute by winding down door glasses or use fresh air mode provided with HVAC system.
4. Before stopping the engine first switch "OFF" A/C and then the blower.
5. During off-season operate the air conditioner a few times every month to lubricate components.
