

The diagnostic connector is located below the dashboard left hand side (co-driver's side) which is shown in the images

OBD-II Connector Location

NOTICE

In case the fault occurs and MIL on the instrument cluster comes ON, contact nearest TATA MOTORS authorized service center. After eliminating the inconvenience, to check the system completely, TATA MOTORS authorized service centers are obliged to run a bench test and if necessary, road tests which may also call for a long journey. The functioning of MIL lamp may also be checked by the traffic police using specific devices.

Odometer and Trip meter (on LCD):

The odometer records the total distance the vehicle has been driven. The trip meter can be used to measure the distance traveled on each trip or between fuel fillings. Keep track of the odometer reading & follow the maintenance schedule regularly for meeting service requirements.

Odometer, Trip meter and Illumination intensity control on instrument panel (LCD):

The instrument panel has an LCD to display the following:
